How Did I Score Compared to Others?

Percentiles compare your scores to those of other students who took the test. Say, for example, your Biology Test score is 500. If the national percentile for 500 is 47, this means you did better than 47 percent of all high school students who took this test (the most recent scores are used).

Because different groups of students take different Subject Tests, you can't compare a Biology Test percentile with a Literature Test percentile, for example.

Will My Scores Change and Why?

Your test score represents a snapshot in time. If you took the test multiple times that number would likely change — increase or decrease — on each test. This is why we sometimes say a score range better represents your true ability; it looks at multiple snapshots of your score instead of just one.

Usually your scores fall in a range of roughly 30–40 points above or below your true ability. Because score ranges are the best representation of your abilities, we say there must be a difference of at least 60 points between your score and another student's score to say that one of you performed better than the other.

Will My Score Change If I Take the Test Again?

The SAT Subject Tests measure your knowledge of a particular subject. If you continue to study the subject and take the test again, your score should reflect your increased knowledge. Also, consider other SAT Subject Tests you might take to showcase your achievement in any of the five subject areas — English, history, mathematics, sciences, and languages. *Scores from the SAT Subject Test in Mathematics are not comparable to Math section, test, and related subscores on the SAT.
*Not all SAT Subject Tests have subscores.

How Should I Send My Scores to Colleges?

This student score report is for your use only. Most colleges require you to have the College Board send them official score reports — they don't accept copies of student score reports, online score reports, or score report labels on transcripts.

With Score Choice™, you decide which scores you send to colleges. Choose by test date for the SAT and individual test for SAT Subject Tests — in agreement with an institution's stated score-use practice. Visit studentscores.collegeboard.org for detailed analysis of your scores and more information on sending scores to colleges.

College Plan

There are a lot of great possibilities to explore in choosing a college. Get a step-by-step road map and advice on what to do when. Access your online score report for details.

SAT Practice

Keep improving your college readiness skills with resources available at Khan Academy®. When you take the new SAT (beginning March 2016), you can further connect to FREE, world-class personalized practice recommendations online on khanacademy.org/sat.

Online Score Report

Go online to get more details about your performance, including areas of strength, and check out the action steps in Skills Insight to help you boost your college readiness.

How Did I Score Compared to Others?

A percentile is a number between 1 and 99 that shows how your score ranks compared to other students. It represents the percentage of students whose scores are equal to or below yours. For example, if your Math score percentile is 57 that means 57 percent of test-takers have Math scores equal to or below yours.

You'll see two percentiles:

The **Nationally Representative Sample Percentile** shows how your score compares to the scores of all U.S. students in your grade, including those who don't typically take the test.

SAT[®] User Percentile — National shows how your score compares to the scores of students who typically take the test.

Will My Scores Change and Why?

Tests are not exact measures, and many factors can affect your score. After all, no two days are the same, and if you took the SAT once a week for a month your scores would change.

That's why it helps to think of your true score as a range from a few points below to a few points above the score earned. Score ranges show how your score can change with repeated testing, assuming your skill level remains the same.

Usually, scores for Evidence-Based Reading and Writing and for Math fall in a range of roughly 30 to 40 points above or below your reported score.

Total: Your score \pm 40 points.

Section: Your score \pm 30 points.

Test Scores and Cross-Test Scores:

Your score \pm 2 points.

Subscores: Your score \pm 2 points.

Am I on Track to Be Ready for College?

You'll see a benchmark score for each section of the SAT. Benchmarks show your college readiness. The Evidence-Based Reading and Writing benchmark is 480 while the Math benchmark is 530. This means if you score at or above the benchmark, you're on track to be ready for college when you graduate high school. If you score below the benchmark, you can still get back on track by focusing on areas where you didn't perform well. Use the detailed feedback in your online score report to see which skills you need to work on most.
